Overview of the DREAMS Dashboards

The DREAMS Dashboards are analytic tools hosted on Power -BI. They are designed to support DREAMS program implementors monitor performance in real time in a dynamic and interactive way.

The Dashboards draws data from the client level DREAMS database and present it in simplified but informative charts and tables.

The goal of the dashboards is to ease program monitoring by providing custom performance visuals and tables thereby reducing the need for repetitive analyses.

Currently, the DREAMS dashboards are only available to the following DREAMS stakeholders;

- DREAMS Implementing partners
- USG agencies; CDC, DOD and USAID

Types of DREAMS Dashboards

Currently, there are three types of DREAMS Dashboards available for the users. These are:

- I. **MER Dashboards**-These dashboards are based on a beneficiary's age at the end of the reporting period i.e. for the first half of the financial year (1st October -31st March), analysis will be based on a beneficiary's age as at 31st March while for second half of the year (April-September), the analysis will be based on a beneficiary's age as at 30th September of that year. This dashboard is ideal for DATIM reporting.
- II. **Operational Dashboards**-The beneficiary's age on this dashboard is computed as at the date of access i.e. this varies each day. This dashboard is ideal for day to day program implementation support/decision making.

NB: The key distinction between the two dashboards lies in the computation of current age.

- III. **Frozen Dashboards:** These are dashboards extracted from the MER dashboards and stored as at a specific date. Data uploaded in the database after the extraction (freeze) date will not reflect in the frozen dashboards (but will be available in the other two dashboards above). These dashboards serve the following main purposes:
 - a. For SAPR/APR reporting. These will be frozen on the date when data was uploaded into DATIM e.g., during APR, the dashboards may be frozen on 30th September. Any data uploaded after that will not reflect here.
 - b. As reference in the event of IP transitions: These dashboards will show the performance an IPs who transition out of DREAMS as at their last date of program implementation.

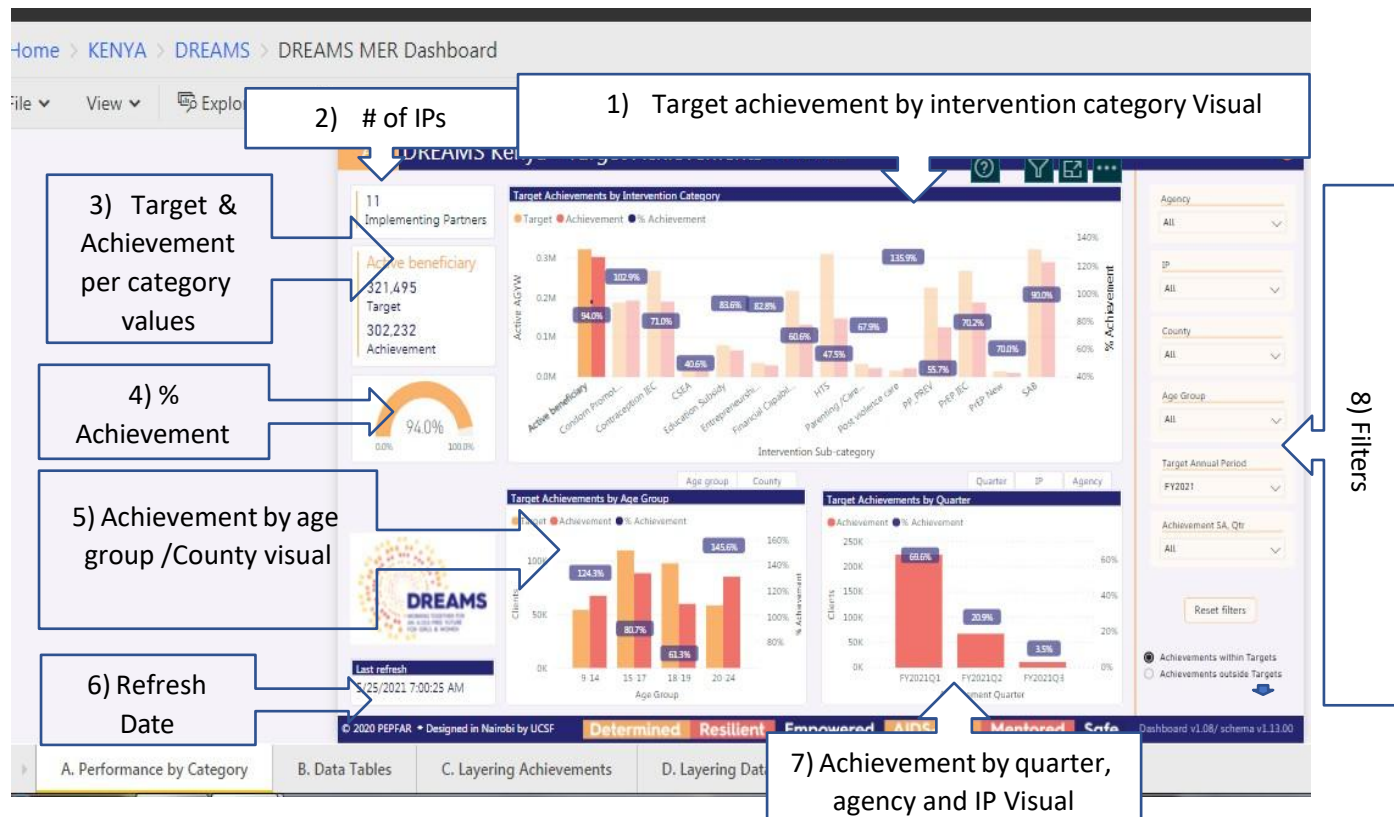

Dashboard tabs

Each of the three dashboards have the following four tabs;

- A. Performance by Category
- B. Data Tables
- C. Layering Achievements
- D. Layering Data Tables

The four tabs are described in detail below;

- A. **Performance by Category Tab:** On this tab, the performance of each intervention is displayed against the annual targets. It has 8 key sections as shown in the screen shot below. A description of each section is also given.

- 1) **Target achievement by intervention category:** This visual shows the percent achievement against target of the selected intervention category
- 2) **Number of IPs-** this shows the number of IPs whose data is being displayed
- 3) **Target and achievement per category:** Display absolute numbers of the target and achievement of the selected intervention category.
- 4) **Percent achievement:** Displays the percentage achievement of the selected intervention category
- 5) **Achievement by age group:** Displays the target and achievement by age group or county for the selected intervention category
- 6) **Refresh date:** Shows the date that the data being displayed was last refreshed
- 7) **Achievement by quarter, IP, agency:** Displays the percent achievement for the selected intervention category by the selected attribute; quarter, IP or agency
- 8) **Filters:** While in the performance tab, you can apply the following filters;
 - a. Agency
 - b. IP
 - c. Age group
 - d. County
 - e. Target annual period; The FY of interest
 - f. Achievement SA, Qtr: The semi-annual period and quarter of interest
 - g. Achievements within targets: Refers to services offered to AGYW for whom USG had set targets

- h. **Achievements outside targets:** Refers to services offered to AGYW whom USG had not set targets e.g. If MLRC is offered to an AGYW aged 16 years, this service will be counted under achievement outside target since MLRC is not meant for this age group and hence there are no MLRC targets for 16 years old AGYW.
- B. Data Tables Tab:** This tab provides achievement against targets data for each intervention category. This data can be exported in excel format for further analysis. The same filters that in the performance by category tab are also available on this tab.
- C. Layering Achievements Tab:** On this tab, the AGYW layering status is displayed. Computation of layering is based on the AGYW-PREV indicator as described in MER indicator reference guide. This tab has 8 key sections as shown in the screen shot below, each section is also described.

- Buttons: The data displayed depends on which of the following buttons you have selected; age group, time in DREAMS, county, agency or IP
- Number of IPs- this shows the number of IPs whose data is being displayed
- Number of active beneficiaries: This is the number of AGYW who meet the criteria of being active in DREAMS at any given time.
- Layering status: This shows the percent of AGYW who have;

- a. PP complete plus SI: Completed the primary package of interventions plus an additional secondary intervention/s
 - b. PP Complete: Have completed the primary package but have not received any secondary intervention
 - c. PP incomplete: Have completed at least one DREAMS intervention but have not yet completed the primary package
- 5) Violence Prevention/Education Subsidy: Displays the percent of AGYW who have received a violence prevention/education subsidy intervention during the FY
 - 6) Refresh date: This is the date when the data being displayed was last refreshed/updated
 - 7) This is a graphical presentation of the performance of the violence prevention and education subsidy interventions
 - 8) Filters: while on layering achievements tab, you can turn on the following filters:
 - a. Agency
 - b. IP
 - c. County, Sub-county, ward
 - d. Age group
 - e. Time in DREAMS
 - f. Annual period
 - g. Semi-annual period
- D. **Layering Data Tables Tab:** This tab provides data associated with the service layering visuals which can be exported in excel format. You can apply the filters in number 8 above while on this tab

DREAMS Indicators

In this section, we describe each of the DREAMS variables whose performance is monitored through the dashboards and the inclusion criteria for a service to be counted in the numerator. For all interventions, the achievement forms the numerator while annual target is the denominator.

1. Active Beneficiaries

Definition	This is a count of all unique AGYW who have received at-least one DREAMS service (any service) within the financial year.	
DREAMS Variables Considered	Any DREAMS service	Notes: - An AGYW is counted under this indicator if they have completed at least one DREAMS service. Age Group Targeted 10-14,15-17,18-19,20-24 years

2. Condom Promotion

Definition	This is a count of all AGYW who received a condom promotion intervention within the financial year	
Services considered	Condom Education and Demonstration, Sister to Sister-K	Notes: - An AGYW is counted under this indicator if she has either received Condom Education and Demonstration OR Sister to Sister-K Age Group Targeted: 15-17,18-19,20-24 years

3. Contraception IEC

Definition	This is a count of all AGYW who received Contraception IEC intervention within the financial year.	
DREAMS Variables Required	Contraception Method Mix - Education/Info, Contraception Method Mix - Individual Counselling	Notes: - An AGYW is counted under this indicator if she has either received Contraception Method Mix - Education/Info OR Contraception Method Mix - Individual Counselling Age Group Targeted: 15-17,18-19,20-24 years

4. Combined Socio-Economic Approaches (CSEA)

Definition	This is a count of all AGYW who received a CSEA intervention within the financial year.	
DREAMS Variables Required	Economic Strengthening - Business Startup Kit, Economic Strengthening – Employment, Economic Strengthening - Entrepreneurship Support, Economic Strengthening –	Notes: An AGYW will be counted under this indicator if she has received at least one of the listed services. If an AGYW has

	Microfinance, Economic Strengthening - Vocational Training	received more than one service, they should be counted only once. Age Group Targeted: 18-19,20-24 years
--	--	--

5. Education Subsidies

Definition	This is a count of all AGYW who received an Education subsidy intervention within the financial year.	
DREAMS Variables Required	Education Support – Uniform, Education Support – Stationery, Education Support-School Fees, Education Support - Other	Notes: - An AGYW is counted under this indicator if she has received at least one of the listed services. If one has received more than one service, they should be counted only once. Age Group Targeted: 10-14,15-17,18-19,20-24 years

6. Entrepreneurship Training

Definition	This is a count of all AGYW who received an Entrepreneurship training intervention within the financial year.	
DREAMS Variables Required	Economic Strengthening - Entrepreneurship Training	Notes: - This is a one-off intervention i.e. an AGYW will only receive this service once during their stay in the program. Despite this, only Entrepreneurship Training offered within the current financial year will be counted against the target given. Age Group Targeted 18-19,20-24 years

7. Financial Capabilities Training

Definition	This is a count of all AGYW who received financial capabilities training intervention within the financial year.
------------	--

DREAMS Variables Required	Economic Strengthening – Financial Capabilities Training	Notes - This is a one-off intervention i.e. an AGYW will only receive this service once during their stay in the program. Despite this, only Financial Capability Training offered within the current financial year will be counted against the target given. Age Group Targeted 10-14,15-17,18-19,20-24 years

8. HIV Testing Services

Definition	This is a count of all AGYW who received HIV Testing Services (HTS) within the financial year.	
DREAMS Variables Required	HTS(Client), HTS (Client Linked to HTS), Respect-K	Notes: An AGYW is counted under this indicator if she has received at least one of these services. If she receives more than one service, she is counted only once. Age Group Targeted 10-14,15-17,18-19,20-24 years

9. Parenting/Caregiver Programs

Definition	This is a count of all AGYW whose parents/caregivers were reached with a parenting/caregiver program within the financial year.	
DREAMS Variables Required	Parent/Caregiver Program - FMP I, Parent/Caregiver Program - FMP II	Notes This is a one-off intervention i.e. an AGYW will only receive this service once during their stay in the program (unless they transition in age and become eligible for a different intervention). Despite this, only Parenting/Caregiver Programs offered within the current

		financial year will be counted against the target given. Age Group Targeted ○ FMP I- 10-14 years ○ FMP II-15-19 years
--	--	---

10. Post Violence Care

Definition	This is a count of all AGYW who have received a post violence care intervention within the financial year.	
DREAMS Variables Required	Physical Violence Enrolled into Support group, Examination/Treatment of injuries, Legal support, Others (Specify), Police, PSS, Rescue/Shelter, Trauma counselling Sexual Violence Emergency Contraception , Enrolled into Support group, Examination/Treatment of Injuries, HTS , Legal support, PEP, Police, PSS, Rescue/Shelter, STI Screening, STI Treatment, Trauma Counseling, Referrals, Others (Specify)	Notes • These are interventions offered to an AGYW who have experienced physical/emotional or sexual violence and received any of the listed interventions. If one receives more than one intervention, they should be counted only once. Screening AGYW for any form of violence does not count as a post violence intervention. Age Group Targeted 10-14,15-17,18-19,20-24 years

11. PP_PREV

Definition	This is a count of all AGYW who have received a PP_PREV intervention within the financial year.	
DREAMS Variables Required	My Health My Choice (MHMC), Healthy Choices for a Better Future (HCBF), SHUGA II, Making Life Responsible Choices (MLRC)	Notes • These are one-off interventions i.e. an AGYW will only receive this service once during their stay in the program (unless they transition in age and become eligible for a different intervention). Despite this, only PP-PREV intervention offered within the current financial year will be counted against the target given. Should an AGYW

		receive the intervention more than once during the FY, they should be counted only once. Age Groups Targeted ○ MLRC- 10-14 years ○ HCBF- 10-14 years ○ MHMC-13-17 years ○ SHUGA II-18-24 years
--	--	--

12. PREP_IEC

Definition	This is a count of all AGYW who receive PREP_IEC interventions within the financial year.	
DREAMS Variables Required	PREP_IEC	Age Group Targeted 15-17,18-19,20-24 years

13. PREP_NEW

Definition	This is a count of all AGYW who were started on PREP within the financial year.	
DREAMS Variables Required	PREP Given	Notes • An AGYW will be counted under this indicator if they were started on PrEP within the financial year. Age Group Targeted 18-19,20-24 years

14. Social Assets Building (SAB)

Definition	This is a count of all unique AGYW attending safe space sessions within the FY	
DREAMS Variables Required	Social Asset Building - Number of Sessions Attended	Notes • An AGYW will be counted under this indicator she attended at least one SAB session within the financial year. Age Group Targeted 10-14,15-17,18-19,20-24 years

15. Service Layering (AGYW Prev)

Definition	Percentage of active DREAMS beneficiaries that completed at least the DREAMS primary package of evidence-based services/interventions. Refer to the MER Indicator reference guide version 2.5. page 34 for additional details on this indicator.  Adobe Acrobat Document
DREAMS Variables Required	-Refer to table 1 in the annexes for the Kenya DREAMS layering table and table 2 of the annexes for the specific interventions mapping by age group. Notes - AGYW should only be counted under AGYW_PREV if they are active beneficiaries; have received a received a primary or secondary intervention as prescribed in table 1 of the annexes.) Age Group Targeted - Refer to the Kenya Layering table annex 1

Annexes

Table 1: DREAMS Kenya Layering Table

		AGE GROUPS (years)			
		10-14	15-19	20-24	Notes
INDIVIDUAL	Primary Individual Interventions	1. Social Asset Building 2. School based HIV & violence prevention 3. HIV and violence risk screening 4. Financial literacy***	1. Social Asset building 2. School /Community based HIV & violence prevention* 3. Condom education and demonstration** 4. HIV risk screening and/or HIV Testing 5. PrEP education and HIV risk screening ** 6. Contraception IEC** 7. Financial capability training (literacy)	1. Social Asset building 2. Community based HIV and violence prevention 3. Condom education and demonstration 4. HIV testing 5. PrEP education and HIV risk screening 6. Contraception IEC 7. Financial capability training 8. Entrepreneurship training	*In school AGYW receive school-based HIV education; out of school receive community-based education **Offered in community settings only due to MOE guidelines. *** Ensure the curriculum is appropriate for the age band (review the existing curriculum)
	Secondary Individual Interventions	• Post-violence care • Education subsidies • HTS (linkage/referral)	• Condom provision • PrEP Provision • Contraceptive Method Mix[#] • Post-violence Care • Combination Socio-economic approaches (e.g. vocational training, internship, link to employment, small business start-up package, microfinance)	• Condom provision • PrEP Provision • Contraceptive Method Mix[#] • Post-violence care • Combination socio-economic approaches (e.g. vocational training, internship, link to employment, small business start-up package, microfinance)	[#]Contraceptive Method Mix includes all aspects (e.g. increase availability, outreach, training, alignment with other initiatives, provision, etc.)

			• Education subsidies • Entrepreneurship training/Bridge to employment***		***Only for out of school AGYW
		DREAMS SNUs			
CONTEXT	Contextual Level Interventions	• Parenting/Caregiver Programming I & II • Community mobilization & Norms Change • Reducing risk of sex partners (link to HTS, VMMC, Treatment)
